SOURABH VISHWAKARMA

Aspiring Data Scientist | Machine Learning & Deep Learning | Python | Data Analytics

+91-9098894503 | www.sourabh555@gmail.com | linkedin.com/in/sourabh9098 | github.com/sourabh9098 | Bhopal, Madhya Pradesh

PROFESSIONAL SUMMARY

Results-driven B.Tech CSE (Artificial Intelligence) final-year student with hands-on experience building and deploying end-to-end Machine Learning and Deep Learning solutions. Proficient in Python, SQL, and TensorFlow/Keras, PyTorch, with 5+ deployed applications spanning classification, regression, NLP, and computer vision. Skilled in EDA, feature engineering, model evaluation, and translating unstructured data into automatable workflows using Streamlit and FastAPI. Seeking a Data Scientist, ML Engineer, or AI/ML internship role to apply analytical and deep learning skills to real-world business problems.

TECHNICAL SKILLS

Languages: Python, SQL

ML & Deep Learning: Scikit-learn, TensorFlow, PyTorch , Keras (ANN/CNN), XGBoost, LightGBM, KNN, Naive Bayes, Decision Tree, Random Forest, Logistic Regression

Web Technologies: HTML, CSS, JavaScript ,, Streamlit, FastAPI

Data Analysis: Pandas, NumPy, Matplotlib, Seaborn, Exploratory Data Analysis (EDA)

Tools: Git, GitHub, Jupyter Notebook, VS Code, Google Colab

PROJECTS

HR Employee Attrition Predictor *2026*

Python | Keras (ANN) | Scikit-learn | Deployed | github.com/sourabh9098

- **Built a deep learning classification model using a Keras Artificial Neural Network to predict employee attrition from HR datasets, benchmarking it against Random Forest and XGBoost baselines**
- **Tuned the ANN architecture and class-imbalance handling so it outperformed both Random Forest and XGBoost on recall, the priority metric for catching at-risk employees**
- **Performed feature engineering and EDA on employee attributes (tenure, satisfaction, income, overtime) to surface key attrition drivers**

TruthLens — Fake News Detection System *2026*

Python | Keras (ANN) | NLP | TF-IDF | Streamlit | Deployed | *TruthLens on Render*

- **Built and deployed a fake news classifier trained on ~45,000 news articles, using TF-IDF vectorization and a 4-layer Keras ANN (512→256→128→1) with ReLU, Dropout, and Sigmoid layers**
- **Designed a dark-themed Streamlit UI with purple accents for real-time article classification, and deployed the full pipeline on Render**
- **Investigated and transparently documented a data-leakage issue (Reuters byline patterns inflating accuracy) as a known model limitation rather than masking it**

Food Delivery Time Predictor *Jan 2026*

Python | Random Forest | GridSearchCV | Streamlit | Deployed | food-delivery-time-by-sourabh.streamlit.app

- **Built an end-to-end regression model to predict food delivery time using real-world features including distance, weather, traffic, vehicle type, and courier experience**
- **Compared Decision Tree vs. Random Forest — Random Forest achieved R^2 of 0.77 with MAE of 6.96 minutes, applying GridSearchCV hyperparameter tuning for generalization**

EDUCATION

B.Tech — Computer Science & Engineering (Artificial Intelligence) *Expected June 2026*
Technocrats Institute of Technology, Bhopal, Madhya Pradesh CGPA: 6.3 / 10.0

CERTIFICATIONS

- **Claude AI Fundamentals (101), 2026**
- **Data Analytics Certification, 2026**
